טופס הסכמה: ניתוח להגדלת שדיים

CONSENT FORM: BREAST AUGMENTATION WITH BREAST IMPLANT

Breast augmentation surgery is cosmetic surgery. Breast augmentation is performed by inserting a breast implant.

The operation is performed following the administration of local anesthesia and sedatives or under general anesthesia.

Name of Patient: _____ _____ _____ _____
Last Name First Name Father's Name ID No.

I hereby declare and confirm that I have been given a detailed oral explanation by:
Dr. _____ _____
Last Name First Name
regarding the augmentation of the **left / right / both breasts *** using the **insertion of a** _____ **implant,** with a **volume** of _____, through an incision **below the breast / surrounding the areola / under the armpit * other** _____
(henceforth: "the primary operation").

I have been given an explanation concerning the expected results and the limitations of breast augmentation surgery. In addition, I have been told that there is currently no accurate data concerning the life span of the implant and the percentage of spontaneous rupture of the implant shell. In cases of rupture or wear, additional surgery may be required to replace the implant.

I hereby declare and confirm that I have been given an explanation concerning the side effects following the primary operation, including pain, discomfort, permanent protrusion of the nipples and changes in sensation of the nipple. I have been told that in any case scars will remain in place of the incisions. The form of scarring depends on my skin type and its healing qualities. In some cases, keloid scars may develop.

In addition, I have been given an explanation concerning the possible complications, including: hemorrhage, infection and asymmetry of the breasts. Furthermore, I have been given an explanation concerning the possibility of complications associated with the implant, including leakage or rupture of the implant shell, and expulsion or rejection of the implant which will necessitate its surgical removal; hardening and shrinkage of the implant capsule leading to discomfort, pain and deformity in the shape of the nipple necessitating removal of the implant; it has been clarified that a relationship between implants and the development of cancerous diseases has not yet been unequivocally proven, nor has the association with certain rheumatic and neural phenomena that accompany diseases of the immune system (autoimmune diseases).

In addition, it has been clarified that the insertion of an implant impairs the ability to diagnose and identify tumors by breast examination.

I have been told of the need for regular periodic follow-up, at least once a year. I hereby give my consent to perform the primary operation.

I hereby declare and confirm that I have been given an explanation and understand the possibility that during the primary operation the need to extend or modify the operation or to perform additional or different procedures may arise, including additional surgical procedures that cannot be fully or definitely predicted at this time but whose significance has been made clear to me. I, therefore, also give my consent to such an extension, modification or performance of different or additional procedures, including additional surgical procedures, which the institution's physicians deem essential or necessary during the primary operation.

I hereby also give my consent to the administration of local anesthesia, with or without intravenous injection of sedatives, after having been given an explanation concerning the risks and complications of the local anesthesia, including various degrees of allergic reactions to the anesthetic drug, and the possible complications of sedatives, which may, in rare cases, cause respiratory disturbances and disturbances in the heart's activity, particularly in patients with heart disease and respiratory disorders. If the decision is made to perform the primary operation under general anesthesia, I will receive an explanation regarding the anesthesia from an anesthesiologist.

I know and agree that the operation and any other procedure will be performed by any designated person, according to the institutional procedures and directives, and that there is no guarantee that it will be performed, fully or in part, by a specific person, as long as it is performed in keeping with the institution's standard degree of responsibility and in accordance with the law.
